grade copper sulphides and oxides. The extent of this zone of enrichment is enormous, and the deposits are remarkable for their amformity. One of the interesting developments of the Ely camp is the culting of a large body of 3 per cent, copper in the new shaft of the Wedge, one of the Cumberland-Egroup. This shaft is now, down over 100 fees, and a station has been cut-at the lower tree for the purpose of drifting on the ore body. Although this lens is lower grade than the ore body of the Veteran mine, which belongs to the same group, there is every present indication that the Wedge will develop a large showing as it is observed up several churn drills are being installed on various parts of the Cumberland-Ely for the purpose of proving up some of the undeveloped territory.

shing plant which is being installed The crushing plant which is being installed at the Star Pointer shaft of the Nevada Consolidated, will prove of great advantage in landing the ores from the Ruth and Star Pointer workings. These two mines are heing connected by a working tunnel some a son feet in extent. The Nevada Northern Railway, which is being continued through Robuson Canon to the leading mines, will early the product of the crushers directly to the smelting plant, fourteen miles below the

The Cumberland-Ely and Nevada Consoliand mines are developed to a point where her show at present over 100,000,000 tons of re blocked out. The erection of a smelting ant which will cost more than \$5,000,000 has sen begun. Assoon as the plant is ready for peration the larger mines of the district. If he in position to furnish all the tonnage can handle.

the bull postion to turnish an ear contage to an handle. The Butte and Elv, the Witch, the McDonald Elv, the Federal Elv and several other of the smaller properties of the district are being developed along very satisfactory lines. There are good showings of ore in all the workings and every hundred feet of development makes it increasingly possible that the one zone of the district is practically continuous. Work at the Giroux is progressing along the conservative lines mapped out by the management, and in all of its working shafts good ore shoots have been encountered. While the Giroux has not the high grade ore to be found in some of the the management, and in all of its working shafts good ore shoots have been encountered. While the Giroux has not the high grade ore to be found in some of the Cumberland-Ely mines nor the extensive development of the Nevada Consolidated, it is considered one of the first three properties in the Ely district. The concentrating plant of the Giroux is nearing completion and will very probably be in operation next fall. Considerable development work is projected for some of the properties lying to the west of the Veteran mine in what is now believed to be the extreme western boundary of the copper bearing zone of the district. Nost of the claims beyond the Veteran are small in acreage, but combinations of interest of the copper bearing zone of the district. Most of the claims beyond the Veteran are small in acreage, but combinations of interest may be effected this spring which will place them in stronger hands. One of the best showings in the extreme eastern section of the district, some ten miles distant from the leteran, is that of the Hercules group, on which active development work will shortly be undertaken.

Nevada Northern Railway is congested The Nevada Northern Railway is congested with freight for the mines, the smelter and the merchants of Ely. Hundreds of cars of limber and equipment are under orders, fuel is being brought in as rapidly as it can be obtained and food supplies are being rushed through in steadily increasing quantities. The fuel situation is improving and it now seems probable that within a month there will be sufficient stock on hand for all requirements.

towns are springing up at Homestead and Hallard's Landing.

West of Baker City the gold belt is lively, active work going on in the Elkhorn by Manager Edward 1. Field with a large force of men on the 400 level and the old Red Boy, which is being revived by the Olive Lake hydro-electric plant just completed: the Bonanza and the regular producers—the North Fole, Columbia, and E. & E. Many new prospects along this belt in the Greenhorn, Granite. Bourne and Cable Cove camps are being developed.

To the south in the Durkee and Gold Hill camps considerable work has been done and preparations are making for dredging in the spring. Placer mining has already commenced in Stice's Gulch, just west of the city, where \$2,000 in nuggets have already been taken.

COLORADO SPRINGS. Feb. 21.—The British American Leasing has declared its fifth consecutive monthly dividend to its four stockholders. The amount is \$3,000. The total disbursements to date aggregate \$12,500. The company operates on the Dante. Cripple

The company operates on the Dante, Chipple Creek.

The Marquette Gold Mining and Milling Company, operating near Salina, Col., has contracted to extend Tunnel No. 1 500 feet on the Sussex vein, making 1,255 feet total. The company has had good assay returns from various parts of its properties.

The Colorado State Investment Company is shipping several cars of \$30 to \$60 ore weekly from its Aileen and Modoc claims, Cripple Creek.

Sharpe-Bell lease on the Accident Cripple Creek, is yielding \$100 ore in d shipments. The ore is coming from The Pharmacist Leasing Company, Cripple The Pharmacist Leasing Company, Cripple Creek, having attained 950 feet depth, is nutting a station and will drift to east and west boundary lines. The Pharmacist was the drst dividend earner of the camp, having lishursed \$85,000 in 1892. It is located on Bull Hill.

Granite company is shipping 3,000 tons

The Granite company is shipping 3,000 tons of \$40 ore monthly. The Gold Sovereign mine. Cripple Creek, a shipping 1,700 tons of \$27 ore monthly. Most of this is on company account. The Bull Hill Mining Company is shipping 1,000 tons of ore monthly from its lease on the Cresson mine, Cripple Creek. The average value is about \$20 a ton.

The Omaha Mining and Leasing Company is doing considerable development work on the Norfolk fraction. Ironclad Hill, Cripple Creek. The shaft is being sunk to 500 feet depth.

the Norfolk fraction, Ironolad Hill, Cripple Greek. The shaft is being sunk to 500 feet durth. The shaft is being sunk to 500 feet durth. The Aiax Mining and Milling Company contemplates erecting a cyanide mill on its Cripple Creek properties.

A vibular cyanide mill of 100 to 250 tons daily capacity is planned by A. D. Franks, locator and owner of 100 acres of mineralized land in Four Mile Creek, Cripple Creek, where are worth 35 to 38.80 is being mined.

The United States Reduction and Refining, whose sixth annual meeting was held in New York last week, is capitalized for 36.000,000 common and 34.000,000 preferred stock. Its plants at Colorado City and Florence, Col., treat Cripple Creek, Utah, Arizona, Old and New Mexico ore and have a capacity daily of 800,000 tons. During the fiscal year ended August 37, 1900, 3236,768 in dividends on preferred stock was paid. The annual gold bullion output approximates 36,000,000.

A. A. Rollenstone of Denver has been appointed receiver for the Economic Gold Extraction Company on complaint of the International Trust Company, trustee. The betition states that \$10,000 worth of lead and copper, bullion and gold extraction is in the ashes and dirt on site. The mill was burned should be succeed as 100 contracted for 10,000 tens of dump rock, and will also ship from leased ground on Carbonate Hill.

The Mayflower Gold Mining and Milling company will remodel the old Alleghany and resurted second in a cleanup for two state, and will modernize it with a capacity of twenty stamps. A tramway two miles in leagth will connect mine and mill.

The Vindicator's experimental low grade mill returned \$6,000 in a cleanup for two reacts.

THREE ORE FINDS AT BUTTE, the process and plans exceting a 200 ton mill at Cripple Creek. The Elkton Consolidated Gold Hinns and Milling Company has declared a dividend

Milling Company has declared a dividend of I cent regular and an extra of 1/2 cent, by 187,300 total, payable in. February: This is the result of two months of output.

The number of miners now working in Cripple Creek approximates 8,000.

CALEMET COPPER:

CALEMET COPPER:

CALEMET, Feb. 19.—One million dollars, or \$5 a share, will be distributed among the shareholders of the Calumet and Arizona Mining Company on March 20. This is the fourmenth quarterly dividend and is payable to stock of record at the closing of books March 1. With the payment of this dividend the total disbursements of the Calumet and Arizona Mining Company will aggregate \$7,000,000.

\$7,000,000.

The Calumet and Arizona is producing at

Arizona Mining Company will aggregate \$7,000,000. The Calumet and Arizona is producing at present at the rate of 40,000,000 pounds of refined copper per annum, this copper costing less than seven cents a pound delivered to the company s property at Bisbee, Ariz., are of extent importance. There are more than thirty-five drifts in the mine in ore now, and big bodies in the Buckeye and Gibrattar claims, revently discovered, are of unknown extent. The Oliver shaft; which is the new opening, is etuipped with the most modern and economical machinery and is producing regularly. The Irish May shaft, the Calumet and Arizona's original producer, is maintaining a large production.

At the Calumet and Arizona's smelter at bouglas, Ariz.; four furnaces are in commission and a fifth is completed and held in resegve. It is understood that preparations are being made for the installation of a sixth. The new furnaces will be utilized mainly for the treatment of the ores from the Superior and Pittsburg mines.

Tenders for the construction of a metallurgical plant for the treatment of ores from the Leziert and gronson mines near Dean Lake. Ont., have, been called for by the Northern Consolidated Copper Company of Sault Ste. Marie, Mich. The plant will be located on the shore of Georgian Bay at a point two and a half miles from the mine. It will be connected with the property by an aerual transway. The plant will transform the ore to a matte so per cent, copper. Arrangements are also being made by the company for the installation of an electric lighting plant at the mine. Work on the south crossent is progressing rapidly, and high grade ore is being opened. Assays show is per cent, copper and \$6 a ton in gold. Recently a seventy pound nugget was taken out and server to Sault Ste. Marie. It assayed 20 per tent copper.

Interest in the Outario mining camps is

seventy pound nugget was taken out and sent to Sault Ste. Marie. It assayed 20 per cent copper.

Interest in the Ontario mining camps is strong, and there promises to be quite a boom in that section with the opening of spring. The Jury Copper Company, Ltd., has been organized at the Canadian Soo with a capital of \$1,000,000, divided into 1,000,000 shares. A tract of 320 acres, located six miles from the Dean Lake station of the Canadian Pacific railroad, is under development. At a recent stockholders' meeting the following directors were elected: President, Charles R. Shaw: secretary and treasurer John A. McPhail O. B. Jury, T. J. Wilcox, J. H. D. Browne, all of the Canadian Soo, and J. E. Whalen of the Michigan Soo.

Excellent progress is being made at the properties near Bruces mines. The Campbell property, three miles north of that point, is showing up well and so is the Bruce mine, where a crew of sixty-five men is employed at the present time.

The Dominion Smelters Company, capital at the present time.
The Dominion Smelters Company, capital \$1,000,000 and with headquarters at Sault

Ste. Marie, Italia. laws of Ontario. WASHINGTON. Marie, has been incorporated under the washington.

Washington.

Seattle, Feb. 19.—Abner Giffen, owner of the Aper mine in King county, was in the city yesterday and reports that his company is building a five mile railway to connect with the Great Northern. The Apex is an arsenical iron mine whose ore runs from one to three owness in gold to the ton. Mr. Giffen states that he shipped \$79,000 worth of ore last year and got out three cars last month despite bad weather that averaged \$2,000 a car. His railroad has two miles completed and is only waiting for the weather to moderate to be rushed to completion.

Work will be resumed at once on the compressor plant being put in on the Saranac mine in the Chesaw. Operations were suspended temporarily on account of bad weather. The shaft of the Harrison, in the same district, is down forty feet and the ore has improved in character. The shaft will be continued to the 250 foot level.

shipping ore. The value of the ore in the neighborhood runs about 6 per cent. copper.

MEXICO.

MEXICO CITY, Feb. 19.—The Naica Mining Company is operating its mines near Mapimi, State of Durango, on a large scale. The output runs from 200 tons to 500 tons of ore daily. The ore is of high grade and averages about \$60 net a ton, of gold, silver and lead. It is a close corporation, composed principally of men who live at San Pedro, Mexico.

The Corona Mining Company, which owns a mine situated adjoining that of the Naica Mining Company, has just encountered two enormous ore bodies in its lower workings.

The Parcionera mine has been sold by the Parcionera Mining Company to the Lewisohn syndicate for \$750,000 gold. This mine is situated in the Santa Eulalia district, State of Chihuahua. Joseph S. Qualey of New York was the principal stockholder in the Parcionera Mining Company, it is said. The company began development work upon the property aboft four years ago and large quantities of rich ore have been disclosed.

Advices from Guanajuato state that the Mexican Milling and Transportation Company, which has a capital stock of several million dollars, is preparing to obtain control of all of the principal mines of that district. Its purposes are outlined as the acquisition of the properties of the San Prospero Mines Company, the acquisition of the Properties of the San Prospero Mines Company, the acquisition of the properties of the San Prospero Mines Company, the acquisition of the properties of the San Prospero Mines Company, the success of the San Prospero Mines Company, the success of the San Prospero Mines Company, the installation of the principal mines of that district. A survey for the proposed belt railroad is now being made. It is estimated that its construction will cost about \$400,000. At present the enormous tomage of the district. A survey for the proposed belt railroad is now being made. It is estimated that its construction will cost about \$400,000. At present the enormous tomage of the different mi

MORE MINNESOTA IRON.

Fine Prospects of Commercial Ore in Mesaba Range.

CALUMET, Mich., Feb. 23.—Another bed of fron has been discovered on the land lying between the Syracuse and Bangor properties, midway between Aurora and Biwabik, in Minnesota. The property, which is owned by the Bradley estate of Duluth, is being drilled by the Longyear Exploration Com-pany. How large the body is has not been determined, but ore has been found in two drill holes several hundred feet apart. One of the drills was working in ore a few days ago at a depth of 200 feet. A third drill is still working out on the ice of Embarrase Lake. opposite the property, but whether ore is being

found there is unknown. The foundation company is now sinking in the ledge at the Syracuse shaft. This is slow work, as the ledge is very hard and but small quantities of powder can be used in

the blasting.
The big pit of the Bangor is now about completed, so that the company can begin sinking the steel concrete shafting. As there is no steel piling to interfere here it is expected to make rapid progress.

H. J. Bartlett, for some time past miding engineer at the Franking group, has accepted the position of superintendent of the Monica mine, near Mckinley, recently acquired by the Republic Iron and Steel Company. The property is a new one and the work of development has just begun. It will be an underground proposition and preparations are now under way to install the machinery and sink a shaft. Every possible effort will be made to make the property a shipper next spring. The Republic Iron and Steel Company recently acquired another Mesaba Range property in the shape of a lease to the west twenty-five acrea of the north half of the southwest quarter of 4,58-17. The land is owned in fee by the Omondaga Iron Company, which is controlled by G. G. Hartley and Chester A. Congdon of Duluth. The pleted, so that the company can begin sinking
